

Dear Employer,

1. With reference to the [MOH press release](#), as a prevention measure to detect early signs of cases infected with the Omicron variant, MOH is implementing enhanced measures to the FET-RRT regime. Please refer to the 2 measures below for immediate action.

**Enhanced Measure 1: All Border-Facing workers on 3 Day FET RRT tested AG+ to undergo Confirmatory PCR Test.**

2. Effective 08<sup>th</sup> Dec 2021, all border-facing workers on 3 Day FET RRT that are tested Ag+ are required to undergo a confirmatory PCR test. Non-dormitory workers that are tested Ag+ are to undergo the confirmatory PCR test at designated test centres arranged via [go.gov.sg/confirmatory-pcr-for-travel](https://go.gov.sg/confirmatory-pcr-for-travel) as soon as possible, within 24 Hours. Thereafter, non-dormitory workers are to self-isolate at home.
3. All dormitory border-facing workers on 3 Day FET RRT that are tested Ag+ are to isolate within a dormitory recovery facility (DRF) or a centralised recovery facility (CRF). During this period, your worker(s) will be issued a Movement Restriction Order (MRO) and they are required to undergo a confirmatory PCR test arranged by MOM. Thereafter, dormitory workers are to remain in isolation at the designated facility.
4. Workers will be allowed to enter or remain in the work-place if the worker has subsequently undergone a PCR test and the test result of that PCR test indicates negative for COVID-19 infection. This will replace the current AG+ health protocol.

**Enhanced Measure 2: COVID-19 Recovered Workers to onboard FET RRT from 8 Dec**

5. Effective 08<sup>th</sup> Dec 2021, border-facing COVID-19 recovered workers entering production site, who are less than 270 days from their date of infection, are to onboard the mandatory 3 Day FET RRT regime. This applies to both dormitory and non-dormitory personnel.
6. Under the previous whitelisting exercise, ART Kits for your recovered non-dormitory workers have already been distributed. Further allocation is being arranged for recovered dormitory workers who have yet to receive kits.
7. To facilitate the potential extension of RRT requirements beyond Dec 2021, companies are to ensure that the worksite declaration on MTI GoBusiness are updated at all times. Workers declared as "Production Site" are required to undergo RRT.
8. Inward-Facing COVID-19 recovered workers, who are less than 270 days of their date of their infection, will continue to be exempted from RRT.
9. [Table 1](#) below summarises the latest RRT regime for workers.

**Additional Information**

10. For guides on uploading of ESSS ART Results: [SRSv1](#), [SRSv2](#), [FWMOMCare](#).
11. For all other queries on ART and ESSS, please refer to [EDB ART Self Swab Guide](#).
